

# Los Angeles Computer Society

## Google Photos

**Dr. Ron Brown will tell us about Google Photos, a FREE program that works on your computer and smartphone. It has a billion users, and 1.2 billion photos are uploaded each day. It's like a shoe box full of photos, but you can easily find a specific photo. It's easy-to-use with storage at little or no cost.**

**Dr. Brown will cover these topics and more with a hands-on demonstration:**

- Do you need a backup strategy?
- How do you sync your photos?
- Who can see your photos?
- How do they get archived after death?

**Dr. Ronald Brown**  
Program Director  
Silvercom Computer and  
Technology Club  
Mesa, AZ

## Member Benefits

- User Friendly, our monthly newsletter.
- Help with computer problems from experienced members.
- Connect with others also interested in computers, tablets, and smartphones.
